

Lisa Dhliwayo

076 618 7066 lisadhliwayo7@gmail.com Cape Town, South Africa

Self-driven, passionate computer science student with a background in multiple programming languages and data structures. I am detail-orientated and able to manage deadlines under-pressure. I am a proactive and excited woman ready to learn and gain experience in the technology field.

Experience

SOFTWARE DEVELOPER ENGINEER INTERNSHIP AMAZON WEB SERVICES – NOV 25 - FEB 26

- Designed and implemented a full-stack feature using TypeScript (backend) and React + TypeScript (frontend)
- Developed scalable backend services using cloud-native architectures to process and transform raw data into structured task timelines.
- Built an interactive Gantt chart UI to visualise data owning a full software development lifecycle from design to testing and release
- Integrated frontend components with backend APIs for real-time data rendering
- Participated in code reviews ensuring code quality and maintainability
- Presentation done at the end of internship to management and teams in EC2.

Key project: Log timeline visualisation using a Gantt chart

Developed a Gantt chart that takes raw log entries (each with a timestamp, service, and log level), organises them by service and groups them into visual bars based on time and zoom level

Used: TypeScript and React

Impact: Transforms complex, high volume log data into a fast, scalable, and visual system that improves system monitoring and debugging efficiency.

ECONOMICS AND STATISTICS HACKATHON – AUG 24

Project: Predictive Insights Cape Town

- Developed a machine learning model to predict youth employment outcomes using Quarterly Labour Force Survey (QLFS) data
- Conducted time series analysis in RStudio to identify trends and seasonal patterns in youth employment
- Generated insights on key socio-economic and temporal factors influencing youth unemployment
- Collaborated in a team of 2 to deliver a data-driven solution under tight deadlines

Education

- University of Cape Town – BSc Computer Science and Business Computing 2022 - present
- Holy Rosary High School – National Senior Certificate - Independent Examination Board (IEB) 2017 - 2021

Technical Skills

- Python, Java, C#, HTML, CSS, GIT, React, TypeScript, SQL

Soft skills

- Communication, Teamwork, Problem solving, creativity
